Abstract

As the world becomes better connected, the English language is being used more. With demand for teachers and resources growing, an abundance of resources can be found online; but this can be overwhelming and difficult for an inexperienced student or teacher to navigate and often a combination of resources is needed for any single topic.

The aim of this project is to create a resource that supplements English learning with activities and information that is found in one place, so time does not have to be wasted locating useful resources.

Acknowledgements

Firstly, I would like to thank my project supervisor, Konstantinos Liaskos for all his patience, guidance and support throughout this project and the whole course.

I would also like to thank the unlikely friends I have made on this course during the pandemic. You drastically improved a year of studying from my room.

Finally, I would like to give a huge thank you to the friends and family who have given me ongoing support and encouragement, and who have given their valuable time to participate in surveys and interviews. I could not have done it without you.
